# WHY DO YOU NEED FUNDING?

# Is the Gambia Missing Out?

- “Since the beginning of the Biden-Harris Administration, the United States has invested and committed to provide nearly \$20 billion in health programs in the Africa region. This includes nearly \$11.5 billion to address HIV/AIDS; more than \$2 billion to combat malaria; more than \$2 billion in support of family planning and reproductive health as well as maternal and child health; and more than \$2 billion to address the health, humanitarian, and economic impacts of COVID-19”
- “USAID recently launched its Accelerating Primary Health Care Collaborative (APHC-C), which aims to work with partner countries in Africa to accelerate primary health care to reclaim lost ground on global health and to foster resilience and preparedness against future threats. These efforts will focus on an initial set of **five partner countries, Côte d’Ivoire, Ghana, Kenya, Malawi, and Nigeria**, harnessing the USAID and PMI health footprint, supported by an average of over \$415 million annually in USAID funds in 2022 and 2023. ”

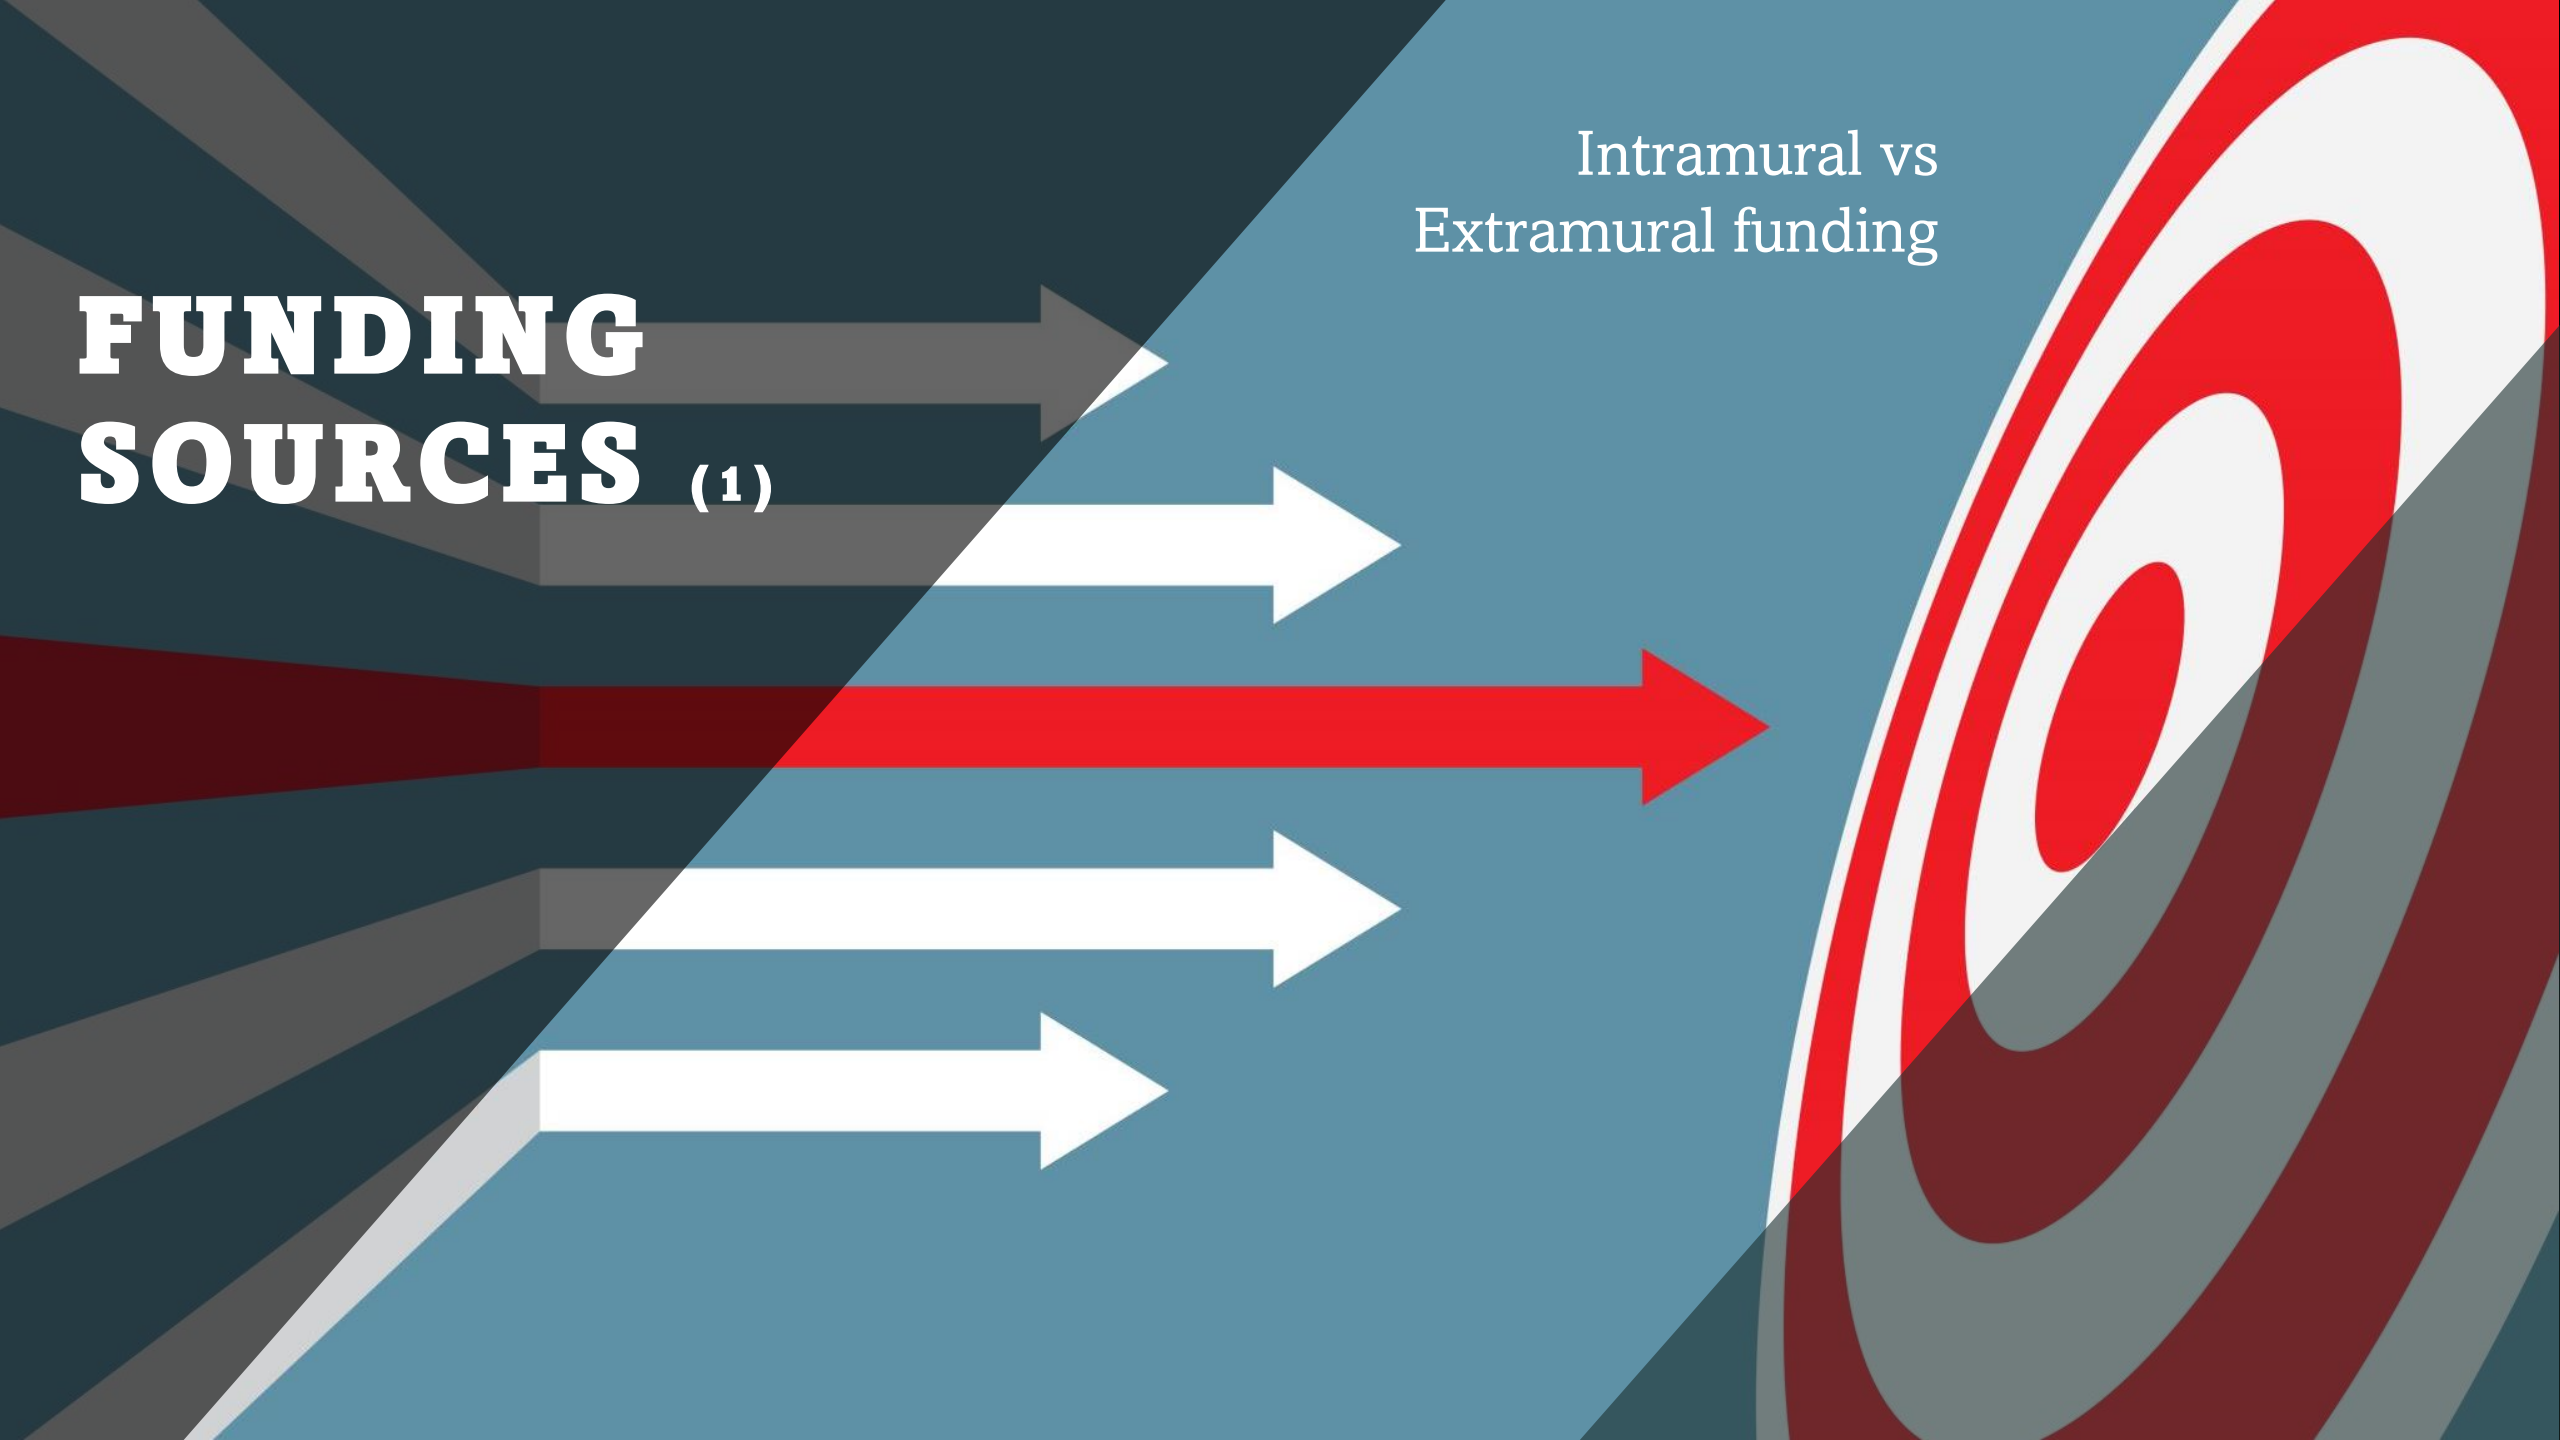

# Group Activity

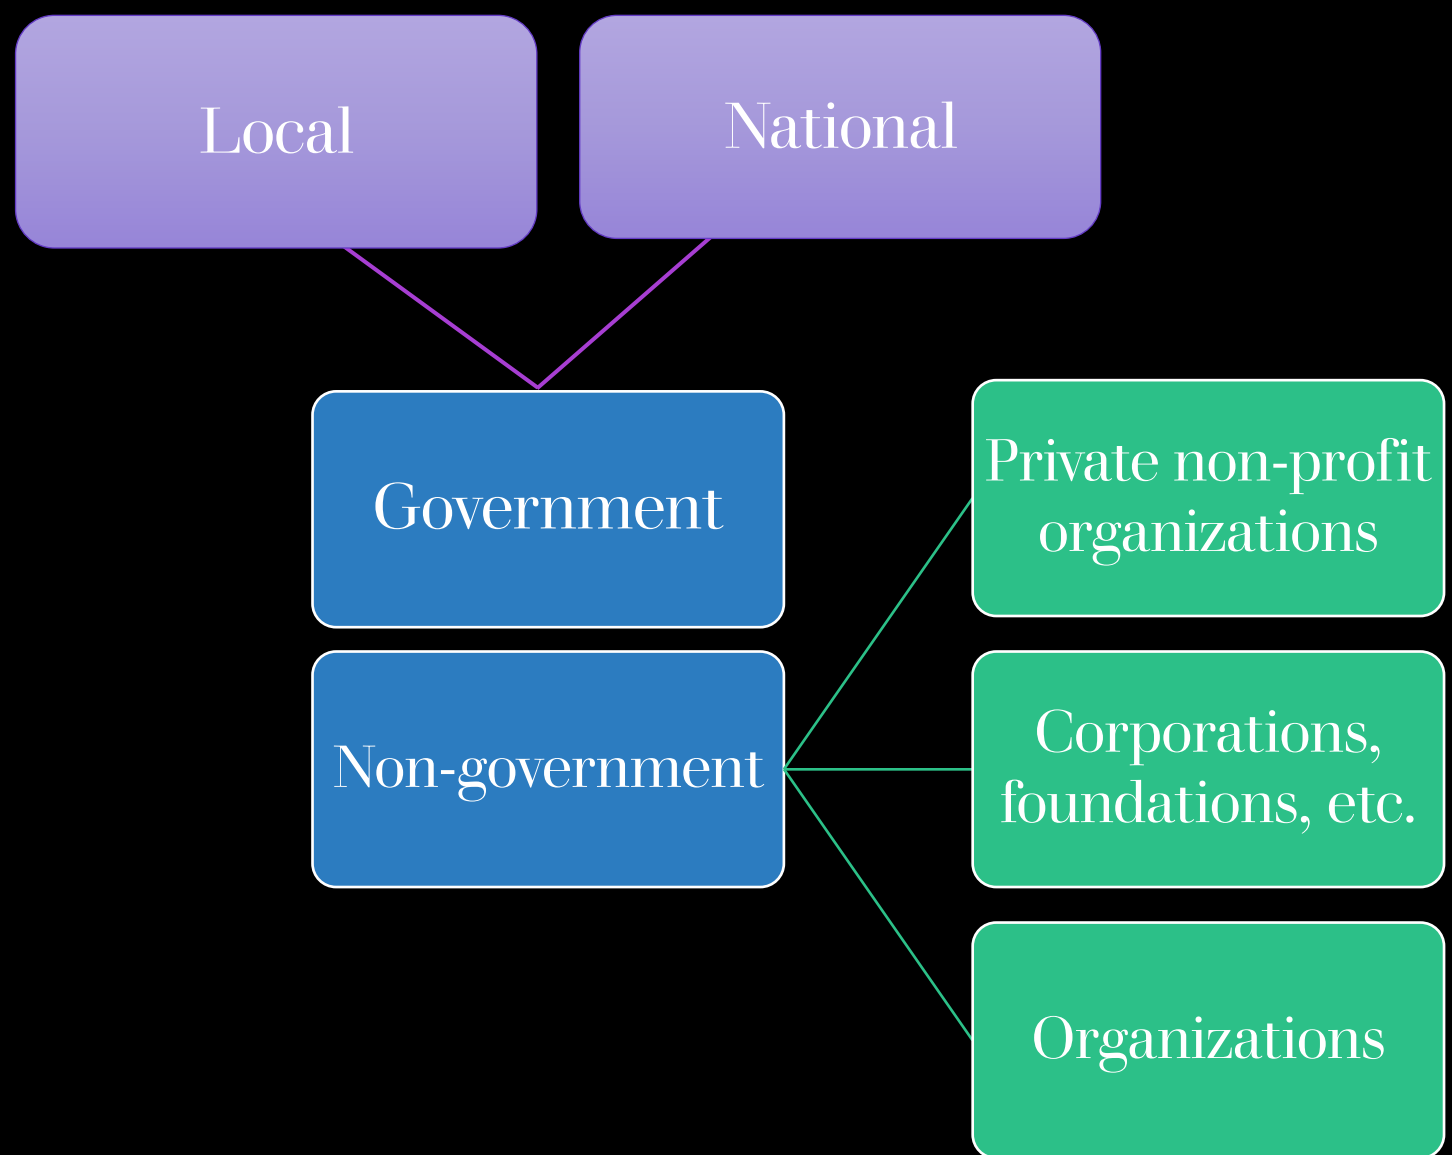

- Which funding sources have you accessed to support your research projects?
- Which funding sources have you accessed to support clinical programs?
- What barriers have you encountered?
- What were lessons learned from the experience?

**FUNDING  
SOURCES (1)**

Intramural vs  
Extramural funding

# Funding Sources (2)

# Funding Sources (5)

## Select Examples

- ❖ African Academy of Sciences (AAS)
  - ❖ National Institutes of Health (NIH)
    - ❖ Fogarty International Center
      - ❖ Center priorities
      - ❖ Funding
  - ❖ Non-NIH grants
  - ❖ Wellcome Trust
-

# Funding Mechanisms
